 - A. The only difference is this one says bad debt, the others didn't.
 - O. Right. But it appears to have at least the same text under the issue

MR. MCDONOUGH: Exhibit 4261?

MR. TORBORG: Yes.

- A. Yes, it does appear to be consistent.
- Q. Do you know why the issue topic was 19 changed into a working paper? 20

MR. MCDONOUGH: Object to form. 21

- A. No, I don't recall why that was 22
- 23 done.
 - Q. Let me ask you just a CLASS related question. Do you see your name there in the

Porter, whether or not the transfers of the 50 million of reserves from the Graduate entities to the DVOG entities could result in a material misstatement of the AHERF financial statements? 5

- A. No. That was nothing that I had looked at or considered.
- Q. Did you know at the time when you knew about the transfers at some point during the 1997 audit, were you aware of at the time that the transfers allowed the DVOG entities to increase their collective bad debt reserve accounts without a charge to bad debt expense?
- A. No. From what I recall, I thought it was just transferring reserves, AR reserves from one entity to another. That was my recollection. So in total it wouldn't have

16 17 changed.

Q. If you could again pull out the collection of AR work papers.
